

Eye Physicians & Surgeons, Inc.

NOTICE OF NONCOVERED REFRACTION SERVICES TO PATIENTS

WHAT IS A REFRACTION?

A refraction is the procedure that determines a patient's eyeglass prescription. Receiving a glasses prescription is not covered by most major medical insurance policies. Vision insurance policies, however, do cover the refraction.

If the doctor determines that you need to have the refraction done and your insurance does not pay for it, you will be held responsible for paying the seventy-five dollar fee (\$75) at the time of service, along with any other fees you are normally responsible for, such as co-payments and/or deductibles.

Please check one of the following options and sign below:

_____ **YES**, I would like the doctor to check whether I need a new glasses prescription.

By agreeing, I understand that the refraction may not be a covered service under my medical insurance plan and that I will pay the seventy-five dollar fee (\$75) at the time of service if a glasses prescription is provided. Eye Physicians and Surgeons, Inc. will submit the refraction to your insurance and if they cover the service, a refund will be issued.

_____ **NO**, I would not like a refraction today.
